

Laos Bare-faced Bulbul & Sooty Babbler Extension

5 Days: Na Hin

Jonathan C. Eames

Bare-faced Bulbul

Day 1: Arrive Vientiane

Arrive at Vientiane International Airport and transfer to hotel. Overnight at Vientiane.

Day 2: Vientiane to Na Hin

Leave Vientiane after breakfast for the three hour drive south to Na Hin. The main target at Na Hin is the recently discovered Bare-faced Bulbul which lives on the limestone karst formations found in the area. Overnight at Sainamhai Na Hin.

Days 3 & 4: Na Hin

Two full days of birding at Na Hin. Other rare and endemic species to look out for here include Red-collared Woodpecker, Limestone Leaf-warbler and Sooty Babbler. Overnight at Na Hin.

Day 5: Na Hin to Vientiane

A final morning birding at Na Hin before heading back to Vientiane for departure flight.
